

GLASOE ANGUS

Calving Ease. Docility. Performance.

GA REIGN 610
AT 2 YEARS OLD
- 6 sons sell -

2019 BULL SALE

Thursday, March 28, 2019 - 1:00 p.m.

Sitting Bull Livestock Auction, Williston, ND

Dear Breeder,

Our sale offering this year combines fresh genetics with proven pedigree combinations, as well as the first sire offering from our phenotypical standout Reign (front cover). While you'll see some exciting and new sire groups in the lineup that provide diverse options, our goals remain the same.

Calving Ease. From birth weight to laboring ease, calf vigor and nurturing ability, we witness and note every birth beyond what EPDs can show. We thus ensure our herd utilizes excellent mothers in regard to both nature and nurture from the start. These dams pass on valuable learned maternal traits, along with their esteemed lineage and genetic potential, to the next generation.

Docility. We bred for this trait long before it became popular — before studies gained attention for proving docile cattle gain more and produce higher quality carcass value in feedlot settings. Glasoe Angus began choosing docile pedigrees nearly two decades ago, and our cows have generations of built-in human tolerance, working ease and gentle personalities backing them.

Performance. It's all about the pounds. Once again, multiple prospects overcame a tough spring and recovering pastures to break more than 800 pounds for their 205-day weights — an impressive feat for them and our cows who rely solely on summer pastures for those gains.

Of note, two of the scale-stomping prospects were raised by twelve-year-old Pathfinders. Lot 1 and Lot 2 combine real-world herd sire potential with the tremendous maternal strength and proven longevity we want. The beautifully structured Colossal Anne and Minabelle dams have produced ten consecutive calves with an average wean ratio in the 110th and 111th percentiles without fail for a decade. They have raised Pathfinder daughters who stand alongside these matriarchs to represent the continued fertility, structural integrity and maternal excellence we demand.

We have high expectations for all of the featured yearling sires in this offering and hope they will benefit your herd for years to come.

CALVING-EASE * DOCILITY * PERFORMANCE

Established in 1973, the Angus breeding program at Glasoe Angus represents nearly five decades of breeding for the needs of the commercial cowman. Kevin and Sydney and their family now carry forward the torch began with Art and Lance. Each and every year the results have shown continuous strides forward. The anticipation for the 2019 offering will certainly not disappoint.

Once again the sons of SAV Resource 1441 and other leading sires will headline this exciting event. Bulls with performance, flushing ability, calving-ease and maternal backing will be represented to suit the needs of the commercial calve man. The genetic opportunity here has never been better.

Plan now to be on hand, Thursday, March 28, 2019, for this important event featuring an outstanding set of yearling Angus bulls representing some of the breed's leading genetics. The majority of this sale offering stems from the great Glasoe foundation female, SAR Colossal Anne 3095 7, who was selected from the Paul Schaff Estate Dispersal in 1980 and remained a pillar of production in the Glasoe breeding program through 19 years of age. The influence of that great cow continues to carry forward.

It is a sincere pleasure and privilege to work with everyone at Glasoe Angus on this sale, featuring the genetics of herd building prospects. Please don't hesitate to call on us at the American Angus Hall of Fame if we can be of any assistance in anyway

Sincerely,

Tom Burke

Kurt Schaff

Resource continues to earn his reputation as one of the best bulls in the entire Angus breed. His progeny boast superior muscle, fleshing ability, phenotype and pure pounds on a moderate frame. Schaff Angus Valley has retained many of his daughters because they showcase excellent broodiness, udder and hoof integrity. By the numbers, Resource scores in the top 1 percent for ribeye. He also scores in the top 3 percent for carcass weight, top 10 percent for wean weight and the top 20 percent for docility.

His dam, S A V Blackcap May 4136, was the iconic, record-earning revenue cow in the Schaff program. Admired worldwide, she earned \$9.5 million in direct progeny sales of 191 sons and daughters before she passed away last year. Resource is backed by the legacy of a true blockbuster dam. His sire is the famous Rito 707 of Ideal 3407 7075. Resource will continue as a go-to stud for our breeding program due to his progeny's eye appeal and stellar performance in our herd.

Granddaughter of Lot 1's dam
G A Colossal Anne 819

Reverence offers a special opportunity for our buyers. The number three bull for a 205-day weight of 814 pounds, he hails from a Pathfinder herd matriarch of twelve years. G A Colossal Anne 7120, who has raised ten exceptional calves within a 365-day calving interval, goes back to our premier foundation female: SAR Colossal Anne 3095 7. She was productive through 19 years of age, and her pedigree has raised one maternal standout after another in our program. These dams offer outstanding fertility, longevity, structural integrity and maternal performance that rise to the top year after year.

Reverence's dam is a true cow maker. One of her Pathfinder daughters raised Lot 27, another high-performance son in this year's sale. Another standout daughter was chosen as our first donor female, and one of her ET daughters sold at the invitational ND AA Select Sale this year. Reverence is the first son 7120 has raised since 2013; his genetics and pedigree don't come around every day.

Reverence gained 3.98 pounds per day – supported purely by the available summer grass he foraged and his dam's milk. He exhibits a wide stance and top and the sire style that will work hard and well for the commercial cattleman. He offers added weight, muscle and volume for progeny, and his daughters would be the kind we keep. He ranks in the top 25 percent or higher in dollar wean value, carcass weight, yearling weight, scrotal circumference and milk production.

Revenue boasts our most prolific bull-maker pedigree and was raised by our other herd matriarch and twelve-year-old dam, G A Minabelle 709. She has effortlessly raised ten consecutive calves while earning coveted Pathfinder status every year of eligibility among many younger, powerhouse cows. She still looks like she is in her prime and is AI bred yet again this year. Minabelle has generated more than \$225,000 in sales for Glasoe Angus, to include our 2012 Glasoe Montana sire and his descendants. We have utilized her sons as natural service sires to build and improve our herd more than any other dam to date.

Revenue is Minabelle's heaviest calf yet with a 205-day weight of 806 pounds and the number four heaviest weaning calf in the herd. Revenue is a genetic beef leader, ranking in the top 10 percent of the entire breed for wean weight, yearling weight and carcass weight. He ranks in the top 15 percent for dollar wean value and dollar feedlot value, as well as in the top 25 percent for dollar beef value.

Regal Montana is another wide-topped, massive bull rugged made to reign. He offers width, mass and frame and overall eye-appeal. His dam is the hard-working daughter of Lot 2's dam: herd matriarch G A Minabelle 709. Regal Montana ranked fifth for his 205-day weight, and he is edging out the competition to rank even higher for yearling weight (yearling weights will be available sale day). His full brother, our 2018 sale-topper, sold to Erickson's of Powers Lake last year.

Regal Montana is the number one Resource-sired bull in EPDs for heifer pregnancy, ranking in the top 15 percent of the breed. He ranks in the top 3 percent for carcass weight, top 5 percent for yearling weight, top 10 percent for wean weight and dollar feedlot value, and the top 15 percent for dollar wean value.

Resolve came out looking like a herd sire within his first week of life. He is a muscular standout with tremendous top, rib and depth. He offers a more compact frame without sacrificing on capacity. He ranks in the top 15 percent for yearling weight and docility; the top 25 percent for wean weight, carcass weight, dollar wean value and dollar feedlot value and the top 30 percent for ribeye and scrotal circumference. He also provides maternal performance with high heifer pregnancy and cow energy value scores.

Our sale offering this year combines fresh genetics with proven pedigree combinations, as well as the first sire offering from our phenotypical standout Reign (front cover). While you'll see some exciting and new sire groups in the lineup that provide diverse options, our goals remain the same.

Resolution may be the deal of the sale. His ears were nipped during the harsh spring, but his performance has been record-breaking. This muscular, lengthy bull earned the heaviest wean weight we've ever witnessed at Glasoe Angus. Coming in at a modest 76 pounds, this bull broke our 205-day weight record at 864 pounds. His dam thus boasted a birth weight ratio in the 95th percentile and a wean weight ratio in the 119th percentile for her third calf, earning her Pathfinder status her first year of eligibility. Her pedigree goes back to Glasoe's Gumbo 840 – a 2008 son who first broke the 800-pound mark years ahead of his herd contemporaries.

Without supplement to him or his dam, Resolution weighed an impressive 196 pounds more than the 2018 breed average. Based on several weigh-ins since, he should earn our top one or two yearling weight as well. Of note, he was our lightest, yet heaviest Resource son.

He ranks in the top 2, 3, 5 and 10 percent for wean weight, yearling weight, dollar wean value and carcass weight in the breed. He ranks in the top 35 percent or higher for docility, ribeye, dollar feedlot value, dollar beef value, heifer pregnancy and milk production. By the EPDs, he provides multi-trait excellence in every sector of production, maternal, carcass and dollar value.

Resource 849 exhibits the length and capacity of his dam and the muscle and fleshing ability of his sire. He ranks in the top 25 percent or higher in wean weight, yearling weight, carcass weight and ribeye. His full sister, G A Colossal Anne 753, sold for \$5,750 as an open heifer at the North Dakota Angus Association State Select Sale last year.

LOTS: 12 -812, 13-817, 14-833

Heritage represents a new genetic opportunity for our buyers. The \$60,000 bull of the 2016 Vintage Angus Bull sale, Heritage provides true multi-trait excellence and outcross pedigree. His marbling and quality grid dollar value place his carcass quality at the very top of the breed, along with a huge ribeye. If you want to raise Certified Angus Beef qualifying cattle, this sire offers exceptional quality and quantity in his genetics.

Heritage ranks in the top one percent for dollar beef value and ribeye. He ranks in the top 10 percent or higher in 14 EPD categories — wean weight, yearling weight, docility, milk and nearly every carcass and dollar index value. One of his daughters sold as the top open heifer for half interest for \$150,000 in last year's sale. His sire, Generation 2100, is out of the \$3 million producer, Sandpoint Blackbird 8809. The dam of Heritage is out of DRMCTR 111 Rita 6108, and she remains the most proven carcass cow in the breed.

Our Heritage sons and daughters are absolute sweethearts who manage to combine great personality with performance. Heritage's three sons ratioed in the 105th percentile for wean weight against our other reference sires. These sons exhibit extra capacity and a sheer volume of pound potential on a substantial frame.

Heavyweight is a rough-made, rancher's kind of bull with immense capacity and frame to produce a sheer volume of pounds and bone. His paternal pedigree is new at Glasoe Angus, it won't be found in other registered herds in the area, and it offers outcross excellence.

Heavyweight was an easily delivered 76 pounds at birth and earned our second heaviest 205-day weight of 842 pounds. His dam, G A Colossal Anne 224, is an absolute bull maker and our top performing dam in the herd. She boasts a nurse ratio in the 113th percentile on five consecutive calves — four bulls and one daughter. Her first calf sold to Greenfield Angus in 2015. We decided to collect semen on her second son, G A Dakota 571, before he went to Lowell Meyers' ranch. Our Dakota daughters will calf this spring and have excelled in herd performance so far.

Colossal Anne's outstanding 2017 son, Genesis, is pictured on the back of the catalog. Co-owned with Stony Creek Angus, we believe he may be one of the best bulls we have ever raised. Genesis exhibits a mighty birth to wean spread, heifer breeding ability and a maternal powerhouse backing him. Of note, he weighed 74 pounds at birth, 863 pounds at 205 days and 1,425 pounds on his birthday.

Heavyweight boasts the same lineage and genetic potential as Genesis for our buyers while also adding Summitcrest Complete, which we haven't utilized before.

Heavyweight earns the highest dollar beef value of all our sires in this year's sale at +186.38 – ranking in the top 1 percent of the breed. He ranks in the top 2 percent for carcass weight, 3 percent in milk production, 4 percent in dollar feedlot value and 5 percent in yearling weight. He ranks in the top 25 percent or higher of the breed in a whopping 16 EPD categories. The final achievement in Heavyweight's genomic profile is his stellar dollar quality grid and marbling score. His genetics will provide super beef volume with highly sought-after Certified Angus Beef quality.

The hero of the Heritage sons in eye appeal, Hero is the careful breeding result of line-bred pedigree with Connealy Consensus 7229 in both the maternal and paternal lineage. Consensus 7229 was the number three bull in the breed for Pathfinder daughters in the 2018 Angus Pathfinder Report, and he ranked number one in percentage of Pathfinders out of eligible daughters of the top 15 bulls. Hero's 2015 dam is on track herself to earn Pathfinder status with a calving interval of 351 days and a wean ratio of 107 on her first two calves. She is AI bred, and so is her top prospect first calf heifer (We AI bred her to Genesis.) Hero's dam, G A Minabelle 512, is a daughter to the dam of Lot 3 and granddaughter to the herd matriarch dam of Lot 2.

Hero's maternal lineage is a bull-making trilogy of excellence, but these dams also attest to superb fertility, longevity and sheer maternal performance. He scores in the top 5 percent for milk production and the top 15 percent for calving ease maternal. We plan to collect semen from Hero with anticipation of not only his sons, but his daughters.

Hero also boasts great calving ease direct combined with wean and yearling production excellence in his genetically enhanced EPDs. He ranks in the top 3 and 4 percent for wean weight and yearling weight. His carcass and \$ Value EPDs are outstanding: he ranks in the top 5 percent for marbling, the top 10 percent for carcass weight, top 1 percent for dollar wean value, and top 4 percent in dollar feedlot value, dollar quality grid value and overall dollar beef value. Of final note, those values place him well within Certified Angus Beef expectations.

Cowboy Up generated plenty of excitement when he sold for \$350,000 in 2016. He offers sound, improving hoof structure and bone, length of spine and a wide base. He is a thick-made bull that ranked third in the nation for progeny registered in 2018 — just behind Resource. He ranks in the top 3 and 2 percent for wean and yearling weight.

Raised near Malta, Montana, Cowboy Up weighed 952 pounds at weaning. He packed on an average of 4.25 pounds per day until his birthday and weighed 1,609 pounds. He boasts great growth on a moderate frame. His sons are stout, and his daughters are feminine and long-bodied. We will be retaining several of his daughters in our herd to calf as replacement heifers.

Lot 15, aptly named, commands double digit calving ease direct on heifers while promising huge growth potential for wean and yearling weights on calves. His hard-working heifer dam earned a 106 nurse ratio on his 779 pounds at 205 days. She boasts seven Pathfinders out of eight pedigrees and carries the lineage of S A V Net Worth 4200, Connealy Forward, Connealy Impression and G A R Predestined. A testament to her fertility, she is AI bred yet again. Command's maternal lineage also contains the dam of Lot 1.

Command exhibits multi-trait excellence scoring in the top 25 percent or higher in 12 EPD categories. He has exceptional marks in wean and yearling weight, feedlot value and dollar beef value.

LOT: 18-845

Coleman Charlo is the grandsire to the record-selling S A V America, who sold in February for \$1.52 million dollars to Herbster Farms in Nebraska. Charlo provides a unique heifer bull option for producers. His progeny are low birth-weight and easy calving with small to moderate frames, and yet they exhibit easy fleshing, muscle and stoutness as they mature.

He scores high on the maternal traits of milk production and cow energy value, and is in the top one percent for \$ weaned calf value. We test-bred him to one of our Resource daughters, and her heifer so far looks to be the easy-fleshing, small-framed cow that could produce a calf nearly her mature weight and be a great fit for the commercial producer if she raises more just like herself.

Charlo's Lot 18 son offers a new pedigree in our heifer bull offering. His dam delivered him in less than an hour from start to finish, and he was up and sucking within minutes. He is a smaller-framed bull that should produce calves that come easy and whose daughters should limit or reduce mature frame size in your herd.

LOT: 19-847, 20-869, 21-863, 22-865, 23-880, 24-879

Reign, pictured on our front cover, exudes sheer muscle and sire dominance in his eye appeal. He is one of the most easy fleshing, athletic and powerful bulls we have raised. Reign hails from a beautiful, moderate P A Safeguard daughter and Resource. His first progeny were born last spring, and his sons exhibit moderate frames, wide stances and stoutness. These sons are on average a full month younger than other AI contenders, but they are exhibiting ample muscle and herd sire appearance. Reign truly stamps his progeny.

We will use Reign in our breeding lineup this summer for the third year in a row and are quite excited to see how his nine daughters perform as mothers next spring. His daughters as a group excelled in phenotype and 205-day weights. Reign's daughters averaged an outstanding 704 pounds on moderate frames. Resource's nine daughters averaged 682 pounds in comparison.

Reign's pedigree offers capacity, as well as phenotype style and strength on a small to moderate frame. He ranks in the top 4 percent for ribeye and 25 percent or higher for heifer pregnancy, carcass weight, yearling weight, feedlot value and scrotal circumference. The pick of our 2016 Resource sons, we have Reign semen available for sale.

Lot 20 is the attractive pairing of our Ebony and PA Power Tool pedigree with Reign. He scores in the top 25 percent or higher in wean weight, yearling weight heifer pregnancy, carcass weight, and dollar feedlot value.

His Ebony dam provides excellent nurturing skills and breed broodiness. His daughters should be highly fertile, moderate-framed and well-uddered with the ability to raise calves that pack on the pounds.

Pathfinder * Embryo Transplant * Parents Qualified

Triumph is stacked with multi-trait excellence as a second-generation Glasoe Angus bull with Glasoe genetics in both the paternal and maternal pedigrees. He boasts six out of eight Pathfinder sires and dams in his lineage. We sold his Pathfinder dam to the Dahls of Keene, ND, in our female sale this fall. His paternal Pathfinder great granddam, G A Colossal Anne 7120, and Pathfinder granddam, G A Anne 113, continue to raise natural calves in our herd. 7120's son is Lot 2 in this sale, and 113 raised a great heifer this past year while also serving as a donor cow in our embryo program. His maternal granddam lived fourteen years and weaned off twelve consecutive calves with an average 365-day calving interval. The great sires Connealy Impression and Connealy Forward, CAR Duke 104 and G A R Predestined carry on in Triumph's lineage.

Triumph provides mass, substantial frame and good bone. His calves were delivered with ease and competed quite well with AI herd sire progeny in their gains. His eight sons and daughters all weighed between 72 and 80 pounds, and his five sons born between the end of March and April averaged 760 pounds at 205 days. (Heritage sons averaged 766 pounds, and Cowboy Up sons averaged 759 pounds).

Triumph ranks in the top 25 percent or higher in 12 traits. From docility to heifer pregnancy, carcass weight, ribeye, milk and \$ beef value, this bull and his progeny have a lot to offer. We also have his semen available for sale.

Lot 26 combines calving ease with excellent growth potential, frame and mass. He ranked sixth in overall 205-day weights, third in average daily gain and hails from one of our deep-ribbed Pathfinder dams. His dam, G A Anne 266, is the daughter of the dam of our Lot 1 bull and Connealy Impression. Our Impression daughters are maternal standouts and produce stylish and eye-appealing progeny. Lot 26 ranks in the top 30 percent or higher of the breed in nine categories.

Lot 27 offers both maternal and carcass traits for his progeny. He scores in the top 10 percent of the breed for heifer pregnancy and has a calving ease maternal score of +9, which is balanced by his calving ease direct score of +8. He offers great milk production in the top 20 percent. His dam is a G A Montana 216 daughter and displays nurturing ability and solid structure and hooves. Lot 27 also ranks in the top 30 percent for wean weight, yearling weight, carcass weight, and overall dollar beef value.

Calving Ease. From birth weight to laboring ease, calf vigor and nurturing ability, we witness and note every birth beyond what EPDs can show. We thus ensure our herd utilizes excellent mothers in regard to both nature and nurture from the start. These dams pass on valuable learned maternal traits, along with their esteemed lineage and genetic potential, to the next generation.

LOTS: 32-838, 33-891

Montana is a thick-rumped, volume bull that boasts G A Minabelle 709 pedigree on both his paternal and maternal pedigrees, as well as the foundational Colossal Anne dam productive in our program for 19 years. We collected semen from him before he sold in 2016. Besides heifer bull pedigree, his maternal traits are excellent. He ranks in the top 3 percent of the breed for heifer pregnancy (his daughters have an exceptional probability of getting pregnant in a normal breeding season), top 15 percent for calving ease maternal and top 30 percent for cow energy value.

Montana has two sons featured in this year's lineup: Lot 32 and 33. Both lots offer heifer bull status and comfort for calving ease. Lot 32 ranks in the top 35 percent or higher for both calving ease direct (how easily first calf heifers will deliver his progeny) and calving ease maternal (how easily his daughters will calve as first calf heifers). Lot 33 ranks in the top 10 percent or higher in both categories and offers a strong maternal index for those wanting to retain daughters. He ranks in the top 25 percent or higher in heifer pregnancy and cow energy value.

We purchased Reserve in 2017 from Greenfield Angus. We bought this bull to service heifers and because he was a son of our Reserve Champ 404, who hails from one of our top performing dams. Reserve offers exceptional calving ease, calf vigor, frame and docility. All of his fifteen calves were delivered with ease, exhibited early vigor standing up and sucking quickly and have been easy to work with from day one.

We would use every single one of Reserve's nine sons with confidence on our heifers. His sons all score in the top 35 percent or higher for calving ease direct on heifers. Those with a +12 CED rank in the top 10 percent of the breed for calving ease. Reserve's pedigree also carries an excellent milk score, as well as excellent marbling and quality grid dollar value, which translates to CAB quality beef.

Served before the sale and begins at 11:30 a.m.

Health:

Bulls have been vaccinated with Bovi-Shield Gold 5 and Oneshot Ultra 7, poured with Dectomax and have been given their first round of foot rot vaccination. It is the responsibility of the buyer to provide the second round. Health papers will be furnished to cattle going out of state.

Feeding:

The bulls have been fed a high-roughage program of long hay, a hay and corn silage mix, and Purina accuration. We did begin feeding differently this winter in comparison to years past. In February we reduced their accuration levels and added alfalfa as a rough forage. We offer \$100 off sale price if the bull is picked

up day of the sale. We charge \$75 per month for each month we feed the bulls/prorated at \$2.50 per day.

Papers:

Papers will be furnished upon request. We reserve 1/3 semen interest in all bulls that are sold.

Terms:

All animals will sell fully guaranteed according to the terms and conditions of the American Angus Association.

Purchaser's Risk:

Each animal becomes the risk of the purchaser as soon as sold, but shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser until loaded for shipment or until the expiration of forty-eight (48) hours after the sale.

Attendance:

All persons who attend the sale do so at their own risk. We assume no liability, legal or otherwise for any accidents.

SALE DAY PHONE NUMBERS:
